

# Public Works Department

## April– June 2023

The Public Works Department completed **213** work orders during the April through June quarter of 2023. In addition to these work orders crews completed **163** brush pickups and **66** bulk item pick ups. During this time crews all assisted with different parts of the new Town Center Development especially when it came time to lay sod and all hands were on deck.

During this Quarter we had Public Works Week where the main Office Staff supplied all of the workers with treats throughout the week to show appreciation for the hard work they do on a daily basis.

The Public Works Department had the following specific projects:

- We were finally able to find and hire a new Sanitation Crew Chief and driver who we are all excited to have on staff and look forward to having him on Team Early.
- In addition to gaining a new Sanitation Driver, the Sanitation Department took delivery of a new Mack side arm trash truck from Labrie. This continues our rotation of purchasing new equipment on a rotating schedule.
- Our crews assisted in the production and harvest of hay from our Waste Water Treatment Facility so it could be sold as an additional revenue source for that department.
- We are currently fully staffed in our full time positions, but are still short a couple of part time. With all the projects we have going and the beginning of Autumn Drive Rehab we are hoping to find some people to fill those additional spots soon.
