

# Public Works Department

October 2022—December 2022

The Public Works Department completed **411** work orders during the October to December quarter of 2022. The Water and Sewer department work orders made up **155** of those. The Sanitation Department handled a total of **145** brush and bulk requests from citizens.

During the Holiday season all departments were busy assisting with the set up of the city lighting displays as well as the continued maintenance of the special seasonal displays and lights. Along with the holiday season the Street and ROW crew has been busy with falling leaves filling streets and storm drainage around town.

The Public Works Department had the following specific projects:

- Increase in line locates due to utility boring throughout town.
- The boring also increased our line damage repairs as some were hit.
- Continued work with the progress at the Town Center Project.
