

## Public Works Report

01/01/2021-03/31/2021

Throughout this quarter public works completed 373 work orders for various types of city maintenance , below is a list of some of the work completed.

Water Install, Repair or Maintenance	134 work orders
Sewer Install, Repair or Maintenance	19 work orders
Storm Drain Maintenance	8 projects
Street/Right-of-way Repair or Maintenance	36 work orders
Brush Pickup	106 work orders
Bulk Trash Pickup	48 work orders

With the addition of see click fix during this time period, we have seen a greater public involvement in helping us manage several areas of public works. Items like brush/bulk pickup, potholes, street repair, and sign repair are now reported through the app and so far it is becoming more useful as citizen join in to help keep us informed.

Along with our usual work to keep the city operating on a day to day basis we are also still working on our infrastructure GIS mapping. Crews are still actively updating our water and sewer lines, valves, manholes, fire hydrant, and clean-out locations to continue to improve our abilities daily.
